Relocating to Melbourne 20 July 2026 | New Zealand citizen with Australian work rights

PROFESSIONAL SUMMARY

Computer Science graduate completing final requirements in June 2026, relocating to Melbourne and seeking graduate or junior roles across software development, QA/testing, technical support, product support, data operations and e-commerce. Hands-on experience with iOS app development, Firebase, React/TypeScript, machine-learning data workflows and AI-assisted development. Fast learner with strong product sense, customer-facing experience and attention to detail.

EDUCATION

Victoria University of Wellington

Wellington, New Zealand

Bachelor of Science, Major in Computer Science

Expected completion: June 2026

- Developed foundations across programming, software design, databases, machine learning concepts and product-oriented technical projects.
- Class Representative for Engineering Design, July 2022 - November 2022.

EXPERIENCE

Clutterbot

Petone, Wellington

Data Collector (Robotics & Machine Learning)

November 2024 - March 2026

- Collected real-world robot interaction data in customer homes for a machine-learning robotics product that identifies, navigates around and picks up children's toys.
- Uploaded and organised datasets through AWS-based workflows to support machine learning, product testing and model improvement.
- Observed robot behaviour in practical home environments and provided feedback on edge cases, reliability issues and user experience.
- Supported market research, marketing content, social media and customer acquisition in a fast-moving startup environment.

Additional Customer-Facing Experience | Calvin Klein, Woolworths New Zealand

- Built strong communication, sales, POS, stock presentation and teamwork skills across premium retail and high-volume grocery environments.

TECHNICAL PROJECTS

Logbook - iOS Fitness Tracking App | SwiftUI, Firebase, GitHub, Figma, AI-assisted development

- Designing and developing a premium iOS fitness logging app with workout tracking, progress insights, social fitness concepts and dark-mode UI systems.
- Used GitHub, Figma and AI-assisted workflows to plan features, debug SwiftUI issues, improve UX and iterate quickly toward an App Store-ready product.

Shopify/OpenAI E-Commerce Prototype | Shopify, APIs, OpenAI, Node.js

- Prototyped an API concept integrating OpenAI with Shopify services to support e-commerce automation and product workflows.

Machine Learning Bench Press Analysis | Python, computer vision / ML concepts

- Created a video-analysis project to assess bench press reps and classify whether reps were completed correctly.

TECHNICAL SKILLS

Languages: Python, Java, C#, C++, JavaScript, TypeScript, HTML, CSS

Mobile / Web: SwiftUI, iOS app development, React, Node.js, Tailwind, Firebase, Shopify

Tools / Platforms: GitHub, AWS, Figma, Microsoft Office, Adobe Creative Cloud

AI & Workflow: AI-assisted development, prompt engineering, debugging, technical documentation, product testing
